I am demonstrating strong skills in my current tenure:

1. Proactively managing important and time-sensitive projects; developing innovative solutions to critical problems with DevOps tools
2. Balancing stakeholder expectations with those of the company;
3. Requirement Capturing and validations- 5-W and 1-H and SPIN Framework
4. Documenting (Business Case, FRS, SRS, BRD) and Wireframing;
5. Project Management with modern methodologies **Agile** (JIRA, ASANA, Slack, and Monday.com);
6. Writing User Stories, Acceptance Criteria, Evaluation criteria, MoSCoW, RICE, ICE and Poker planning,
7. Leading the cross-functional team- Working collaboratively with other team members to establish efficient and effective systems of operation.

In my time in my current organization, I am noted for having achieved the following:

1. Executing a number of highly profitable projects within a time frame.
2. Working with my team to manage the accounts of prestigious international brands and clients
3. Implemented Agile in the company for better visibility of the projects
4. Knowledgeable standard tools to map industry standards (DevOps- Docker, git, and AWS)
5. Successfully contributing to QA testing, product SOW, integration, and user documentation.

I will plan to draw on these methodologies with my future organization to effectively complete project scheduling, issue tracking, and resource management tasks.

Furthermore, I have a strong academic background to ground my work. After completing my Bachelor of Information Technology Management at the University of Rajasthan, I went to acquire a Master's degree in CSE Technology and got my research paper published in Elsevier Journals.

I believe that the above qualities and experiences would make me a valuable addition to your company. If there is any more information you would like me to provide, please do not hesitate to contact me.
